

# Tran Kim Dat

## FULL-STACK ENGINEER

(+84) 98 356-4074 · [kimdat0705@gmail.com](mailto:kimdat0705@gmail.com) · Da Nang City / Ho Chi Minh City, Vietnam  
[github.com/dattk2002](https://github.com/dattk2002) · [linkedin.com/in/kimdat0705](https://linkedin.com/in/kimdat0705)

### PROFESSIONAL SUMMARY

Full-stack Engineer with 3+ years of experience delivering production web and cross-platform mobile applications with TypeScript, Python, C#, JavaScript, Dart, and SQL. Built AI learning workflows that use Gemini grounded search, Exa, and Tavily to research sources and generate syllabi and lesson cores, with Langfuse for AI workflow tracing. Experienced in REST APIs, relational data models, authentication, real-time systems, caching, rate limiting, and background processing using FastAPI, NestJS, ASP.NET Core, PostgreSQL, MongoDB, and Redis. Own architecture, automated testing, Docker containerization, GitHub Actions CI/CD, and cloud delivery on Render and Neon.

### WORK EXPERIENCE

#### DAN SOLUTIONS

Oct 2025 – May 2026

TamdaCMS / TamdaOne - [tamdamedia.eu](https://tamdamedia.eu) - [tamdagroup.eu](https://tamdagroup.eu) - [tamdaexpress.eu](https://tamdaexpress.eu) - [tamdaoc.eu](https://tamdaoc.eu)

- Delivered 10 features across public websites and admin dashboards spanning 5 business verticals, independently owning the cycle from Figma handoff to production deployment.
- Designed and configured 12+ Strapi content schemas with Swagger-documented REST APIs, enabling editors to publish content independently of backend release cycles.
- Translated reusable content and layout patterns into maintainable CMS modules, keeping public-site and admin experiences aligned across releases.
- Collaborated directly with backend and design teams to deliver on schedule with clear cross-functional ownership.

Caocao Adventures - [caocaoadventures.com](https://caocaoadventures.com)

- Led frontend architecture and shipped 3 core modules - tour browsing, rentals, and blog - to production within 2 months.
- Built a reusable React, TypeScript, and Ant Design component library for layouts, forms, and data display, reducing per-screen implementation effort and enforcing consistent UX patterns.
- Integrated responsive booking and content flows with API-driven data states across desktop and mobile breakpoints.

#### CAPSTONE PROJECT

May 2025 – Sep 2025

NgoaiNguNgay - [ngoai-ngu-ngay.vercel.app](https://ngoai-ngu-ngay.vercel.app)

- Integrated SignalR events into the React client for real-time 1:1 chat, covering message receipt, editing, deletion, unread-state handling, and automatic reconnection.
- Built booking flows for tutor availability, learner requests, tutor offers, instant bookings, cancellations, and status-aware scheduling.
- Implemented role-specific learner, tutor, staff, and manager interfaces across a React/Vite frontend containing 16 routed pages and 79 component files.

#### DAN SOLUTIONS

Dec 2023 – Aug 2024

Fastcare - [fastcare.vn](https://fastcare.vn)

- Took full ownership of frontend delivery for a multi-category repair-booking platform with Next.js and TypeScript, from component design to production deployment.
- Standardized API-integration patterns and Ant Design component architecture across the codebase.
- Delivered Fastcare UI v2 across 20+ screens, including homepage, blog, and accessory-category routes, using Next.js and shadcn/ui.
- Implemented PHP Laravel admin-dashboard workflows for content and operational management, complementing the customer-facing Next.js platform.
- Created shared loading, empty, and error states for API-backed booking and catalog journeys.

VNCaps - [vncaps.edu.vn](https://vncaps.edu.vn)

- Architected a cross-platform school-management dashboard spanning 15+ screens with role-based access for student, teacher, and administrator workflows.
- Integrated Expo Notifications for push-alert delivery and built a timetable module with dynamic schedule rendering.
- Structured role-aware navigation and reusable dashboard components so each user workflow could evolve independently.

### INDEPENDENT PRODUCTS

#### Bravodemy

Aug 2026 – Present

UI: [bravodemy.com](https://bravodemy.com) - GitHub: [github.com/tkhieu/AIMicroLearningPlatform](https://github.com/tkhieu/AIMicroLearningPlatform)

- Owned most of the architecture and end-to-end delivery of an AI microlearning platform whose core strength is turning natural-language goals into source-grounded syllabi and lesson cores, followed by 5–10 minute lessons, practice, spaced review, and progress tracking.

- Integrated Gemini grounded search with Exa and Tavily to research learning topics and supply source context for syllabus and lesson-core generation across technical and non-technical domains; used Langfuse to trace the AI generation workflows.
- Built 107 FastAPI endpoints and 35 SQLAlchemy models for research and content-generation workflows, learning paths, secure cookie authentication, admin/privacy tools, Polar entitlements, and deterministic Python/SQL grading.
- Deployed independent UI/API services to Render Singapore with health-gated auto-deploys and Neon PostgreSQL pooled runtime/direct migration connections; added fail-open Redis caching, rate limits, and distributed locks.
- Delivered a bilingual Next.js 16/React 19 UI with Tailwind CSS, Radix UI, Recharts, GSAP, light/dark themes, and WCAG 2.2 AA checks. Established CI for PostgreSQL 16, builds, accessibility, and responsive journeys across Chromium/Firefox/WebKit; verified 192 backend tests at 85.11% coverage and 151 frontend tests.

## TapMood

Jun 2026 – Jul 2026

UI: [github.com/dattk2002/tap-mood-ui](https://github.com/dattk2002/tap-mood-ui) - API: [github.com/dattk2002/tap-mood-api](https://github.com/dattk2002/tap-mood-api)

- Architected a Flutter/ASP.NET Core 10 social check-in product for six platforms with PostgreSQL, SignalR, Firebase, Gemini, Docker, and 92 automated tests.
- Designed 117 REST endpoints and 38 EF Core entities for chat, presence, notifications, moderation, check-ins, privacy, and AI features.
- Engineered resumable 250 MB video uploads with SHA-256 chunks and background H.264 processing; added Google/OTP auth, session rotation, export, retention, and audit logging.

## HabiStride

May 2026 – Jun 2026

UI: [habi-stride-ui.onrender.com](https://habi-stride-ui.onrender.com) - API: [habi-stride-api.onrender.com](https://habi-stride-api.onrender.com)

- Architected and shipped a gamified full-stack habit tracker whose Virtual Tree grows through completed habits, streaks, and milestone rewards.
- Built 24 REST handlers across 7 NestJS controllers and modeled 10 PostgreSQL entities with TypeORM, secured by Google OAuth2 and JWTs in HttpOnly cookies.
- Containerized frontend and API services independently and deployed them to Render with managed PostgreSQL.
- Delivered a Next.js, shadcn/ui, and Tailwind CSS dashboard for daily habit tracking and analytics.
- Designed the API and UI as independently deployable services.
- Scheduled daily-log snapshots at 00:00 Asia/Bangkok with NestJS Scheduler to preserve habit history.
- Delivered 8 Next.js App Router pages and 22 reusable UI components for dashboard, habits, insights, settings, Virtual Tree, and authentication flows.

## Trivia Quiz

Apr 2026 – May 2026

[trivia-app-elb2.onrender.com](https://trivia-app-elb2.onrender.com)

- Built and deployed a full-stack trivia application with Next.js and MongoDB/Mongoose, featuring session-based gameplay and a custom question-bank API.
- Containerized the application with Docker and deployed it to Render, independently owning architecture, API design, and the deployment pipeline.
- Modeled quiz sessions and question-bank access as reusable server-side flows.
- Implemented 7 API handlers across 5 Next.js route files and 2 Mongoose models, including a 1-hour TTL index for quiz-session cleanup.
- Kept correct answers out of the initial quiz payload and validated submissions server-side, preventing duplicate scoring for already-answered questions.

## EDUCATION

- FPT University - Bachelor's Degree in Software Engineering · Sep 2021 – Sep 2025
- Graduated - GPA: 3.24 / 4

## SKILLS

- Languages: TypeScript, JavaScript, Python, C#, Java, Dart, SQL
- Front-end / Mobile: React, Next.js, Flutter, Tailwind CSS, Ant Design, shadcn/ui, MUI, Zustand, Redux, React Query, Framer Motion, GSAP
- Back-end / Data: FastAPI, NestJS, ASP.NET Core, Laravel, Strapi, PostgreSQL, MongoDB, Redis, SQLAlchemy, Entity Framework Core, TypeORM, SignalR, Socket.IO
- AI / Research: Gemini grounded search, Exa, Tavily, Langfuse, source-grounded syllabus and lesson-core generation
- Architecture / Delivery: REST APIs, CI/CD, Docker, Render, Neon, GitHub Actions, Pytest, Vitest, Playwright, Figma, Git

## HONORS & CERTIFICATIONS

- EF SET English Certificate - 78/100, C2 Proficient (2022)
- Computer Communications Specialization - Coursera (Oct 2, 2021)
- Software Development Lifecycle Specialization - Coursera (Jun 3, 2022)
- Academic English: Writing Specialization - Coursera (Feb 8, 2023)
- User Experience Research and Design (UI/UX) - Coursera (Nov 20, 2023)
